

This Halloween...Who's Keeping An Eye On Your Computer

Many school CEOs and principals we work with wait FAR too long to have us check and update their computer network's health and security. Unless we are actively performing regular daily/weekly/monthly maintenance, a nasty virus, malicious hacker,

unexpected software corruption, hardware failure or dozens of other problems could catch you off guard and result in extensive downtime, data loss and expensive data recovery efforts.

That's because many schools do not perform regular maintenance on their network and therefore are overlooking many serious threats that are increasing all the time. At some point, disaster strikes and they find themselves in a real mess, with a network down and employees sitting idle, waiting to get back to work.

By then the damage is done, and it can cost thousands of dollars to get the network back to normal, if that's even possible. What saddens me even more is the fact that almost every one of these costly disasters could have easily been prevented if someone had checked their network's security and health to remove these threats on a regular basis.

No More Excuses! Our Free Network Checkup Will "Exorcise" The Demons Hiding In Your Computer Network

From now until Halloween (October 31st), we're offering all clients and newsletter recipients a FREE Network Checkup (\$497 value) so that you have no excuse for not making sure your computer network is safe and sound. **Schedule your FREE Network Checkup to "see" if you are truly safe from spyware, viruses, hackers and other SPOOKY disasters by calling our office at 773--383-5023.**

"As a School CEO or Principal, you don't have time to waste on technical and operational issues. That's where we shine! Call us and put an end to your IT problems finally and forever!"

Don't Make These 3 Mistakes With Your Next Office, Classroom or Campus Move

Moving is always a pain in the rump, but it doesn't have to be a horrific, expensive experience. The No. 1 lament from someone who's experienced a "bad" move is "I didn't know I needed to..." followed closely by "I completely forgot that..." In other words, *it's what you don't do that makes the move a disaster*. To make your move easy and effortless, here are the 3 most common mistakes you want to avoid:

Mistake #1 — Trying To Save Money By Using Your Employees To Move Your Computer Network

Don't ask your staff to disconnect, move and reconnect computers, phones and other devices just to save a few bucks. You'll frustrate them and end up with phones ringing at the wrong extension, lost cables and PCs that get dropped. You don't want to let your movers do this job either; they may be great at moving furniture, but a network is a lot more sophisticated and sensitive. *Be smart and hire an IT pro to pack and move your network.*

Mistake #2 — Not Hiring The RIGHT IT Firm To Move Your Network

While we're on the topic, make sure you know what to look for when outsourcing the move. A few things to look for would include references from other clients, proof of insurance (get them to fax you a copy), a service-level guarantee limiting the amount of time you are down and a professional, organized approach to quoting the move. A real pro will insist on visiting your current location as well as your new location to conduct a detailed site survey. NEVER hire anyone who wants to quote moving your network over the phone.

Mistake #3 — Not Giving Your Phone, Internet And Cable Vendors Enough Advance Notice

80% of unexpected communications blackouts and cost overruns on network moves are caused by failure to properly plan voice, data and electrical installation *in advance*. Just because the prior tenant had computers and telephones is no guarantee that the cabling is suitable for *your* phones and *your* computer network. Allow at least 6 weeks for Internet and telephone connections to be installed. Advance planning will help you avoid emergency rush fees or Band-Aid fixes to make things work.

Call us before your next move and get a Checklist, Site Survey and Network Plan for only \$99!

Refer Our Services And We'll Donate \$100 To Your Favorite Charity!

We love having you as a customer and, quite honestly, wish we had more like you! So instead of just wishing, we've decided to hold a special "refer a friend" event during the month of October.

Simply refer any company with 10 or more computers to our office to receive a FREE Computer Network Assessment (a \$397 value). Once we've completed our initial appointment with your referral, we'll donate \$100 to your favorite charity for every referral that you've sent, as a small thank-you for thinking of us.

Simply call us at 773-383-5023 or e-mail us at info@akacomp.com with your referral's name and contact information today!

Shiny New Gadget Of The Month:

Neo Grab

It's amazing how quickly our technology evolves. When the GPS devices for cars first came out, could we imagine that our phones would quickly take over that job? More and more, we see people using their phones to navigate in the car, but holding on to the phone while driving can be dangerous. The result has been a series of phone-holding apparatuses that cling to the car in the same manner our GPS's did.

Finally there is one that is not only functional, but also beautiful, and it battles one of the biggest problems with car phone holders. The NEO GRAB allows you to mount and remove your phone one-handed, and it works for you in ways unimaginable, not only in the car, but also in the kitchen, office, bathroom, bedroom, garage, at work, etc. With its extreme suction cup, the NEO GRAB is easy to attach to any smooth, non-porous surface, like glass, drywall, plastic, wood and metal.

The NEO GRAB fits devices with LCD screens up to 6 inches and can be used for smartphones, mini-tablets and even your GPS device. Needless to say, this is the ideal accessory for any smartphone user.

It comes in 5 colors and can be purchased for \$34.99 from www.SkyMall.com.

LENOVO TECHNOLOGY FOR EDUCATION: HOW AND WHY CAN SCHOOLS BENEFIT FROM IT

Lenovo Technology for Education brings about a change in the way we teach and learn. This year's Lenovo Education tools bring together several different technologies that enable an immersive, interactive 1:1 learning experience. From energy-saving all-in-ones with rich multimedia to a revolutionary form-factor PC that makes the most of emerging trends such as desktop virtualization—Lenovo Education tools aim to transform the way schools can make use of technology to fit their particular needs.

The Lenovo ThinkCentre M72z brings the ultimate in interactive education for all students. It is durable, it saves space and is powered by the latest exclusive Lenovo technologies that allow teachers to pack their curriculum with creativity.

The Lenovo ThinkCentre M92p Tiny embodies the kind of technology required for 21st century education: one that provides a high-end learning experience in an economical manner at all levels, with enhanced performance.

The Lenovo ThinkPad X131e is the latest Lenovo education laptop and one of our toughest PCs yet. It helps students and teachers get the most out of their time and resources by giving them access to education anywhere.

In conclusion, the tools and services offered by Lenovo Technology for Education are a step towards the future of education. They enhance your school's ICT so students can make the most of their school years.

Lenovo's investment in education isn't simply restricted to making the ideal tools for schools. We are interested in all aspects of education and, we collaborate with schools and organizations so that students can achieve their true potential. Here are some of the things we have recently been up to in the education sector across the world.

EDUCATION RESEARCH INITIATIVE

Lenovo's Education Research Initiative aims to discover how to best harness educational technology for the classroom. The research focuses on several areas such as 1:1 learning, collaborative and eLearning, examining what does and doesn't work in the ICT deployment at schools and colleges. We measure the efficiency of technology across levels in education and provide research-based prescriptions, as well as outreach and educational programs. 5 Tools To Better Manage Your In-box

In 2013, over 100 billion business e-mails were sent every day. According to the Radicati Group, that number is expected to exceed 132 billion e-mails per day by 2017.

That means approximately 100 e-mails hit your in-box per day. No wonder it's so hard to keep your in-box relatively clean. Here are some tools that can help:

Mailbox - Mailbox makes it easy to organize your in-box from your smartphone. You can quickly archive, delete or save messages for later. You can even add e-mails to your to-do list so you never forget about a message you don't have time to address when it first arrives.

The Email Game - The Email Game turns responding to and archiving e-mails into – you guessed it – a game. Skip an e-mail and you lose 25 points; respond to one and you gain 175 points. You can also challenge yourself to sort through your e-mail in a set time period.

Unroll.me - Sorting through all the e-mail you've subscribed to (or been subscribed to) can be tough. This service takes all your subscription-based e-mails and transforms them into a daily digest.

SaneBox - SaneBox moves unimportant e-mails out of sight so you can focus on your most important tasks. SaneBox uses an algorithm to filter through your e-mails and put nonessentials into a folder for you to look at later; that way you can focus on the important stuff.

ActiveInbox - If you use Gmail, ActiveInbox turns e-mail into a task management system. You can categorize tasks as "action," "waiting on" or "overdue." If you need something done on a certain day, you can schedule it on your calendar and receive a reminder.

Who Else Wants To Win A \$25 Gift Card?

The Grand Prize Winner of last month's Trivia Challenge Quiz is:

Felipe Mejia! CONGRATS! The Gift Card is on its way to you.

He was the first person to correctly answer my quiz question from last month: **The length of time between the March equinox and the September equinox is the same as the time from the September equinox to the next March equinox. True or false?**

The correct answer was False. Now, here's this month's trivia question. **The winner will receive a gift card to a restaurant of our choice.**

Complete this old farmers' saying: "Rain in October means _____ in December."

a) snow b) wind c) ice d) warmth e) mice

The Lighter Side:

Halloween Graveyard Story from Vienna

Chris Cross, a tourist in Vienna, is going past Vienna's Zentralfriedhof churchyard on October 31st. Suddenly he hears some music. No one is around, so he starts searching for the source. Chris finally locates the origin and finds it is coming from a grave with a headstone that reads: Ludwig van Beethoven, 1770-1827. Then he realizes that the music is the Ninth Symphony and it is being played backward! Puzzled, he leaves the graveyard and persuades Tim Burr, a friend, to return with him.

By the time they arrive back at the grave, the music has changed. This time it is the Seventh Symphony, but like the previous piece, it is being played backward. Curious, the men agree to consult a music scholar. When they return with the expert, the Fifth Symphony is playing, again backward. The expert notices that the symphonies are being played in the reverse order in which they were composed, the 9th, then the 7th, then the 5th. By the next day, the word has spread and a throng has gathered around the grave. They are all listening to the Second Symphony being played backward.

Just then the graveyard's caretaker ambles up to the group. Someone in the crowd asks him if he has an explanation for the music.

"Oh, it's nothing to worry about," says the caretaker. "He's just decomposing!"
